## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- A) Various symptoms (e.g. agitation, cognitive impairment, etc.) (see claims 2-8).
- B) Disorders or conditions (e.g. schizophrenia, Tourette's syndrome temporal lobe epilepsy, etc.) (see claims 9-15).

Applicants are required, in reply to this action, to elect a single ultimate species from A and a single ultimate species from B to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicants will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicants must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1617

The claims are deemed to correspond to the species listed above in the following manner:

Claims 2-8 for the various symptoms.

Claims 9-15 for the various disorders or conditions.

The following claim(s) are generic: 1 and 13-15.

The various **symptoms in A** listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species lack the same or corresponding special technical feature because for example the symptoms of cognitive impairment, is different and unrelated to the symptoms of agitation.

The various **disorders or conditions of B** listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species lack the same or corresponding special technical feature because each of the medical disorders or conditions to be treated has different etiologies and different know treatments.

A telephone call was made to Ms. Erin Sommers on October 17, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicants are advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 1617

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
